QUALITY POLICY

Scatec is founded on a vision of **Improving Our Future** through renewable energy production around the world. Our activities are a commitment to our long-term ambition, with our Power Plants made to work reliably and efficiently over their entire lifecycle. Our mission as a company is to deliver competitive and sustainable renewable energy globally, to protect our environment and to improve quality of life through innovative integration of reliable technology.

By adhering to strict quality management practices and always striving for improvement, we aim to meet today's energy needs while also creating a sustainable energy future.

This policy provides a framework for setting and reviewing measurable quality objectives at all levels. It is communicated throughout the organization and made available to interested parties as appropriate.

We are committed to:

- Continually improving our services to meet customer, legal, and regulatory requirements and to produce work that we can be proud of.
- Ensuring that this policy and quality goals are integrated into our daily work processes and align with our overall strategies.
- Regularly enhancing our quality management system to meet our goals and requirements

Key principles:

- Achieving quality goals is an ongoing process, not just a one-time effort.
- Everyone should be aware of quality objectives that relate to their daily work.
- We expect that our partners and suppliers will deliver products and services that meet our quality standards.
- We aim to build strong partnerships to improve our products and services.
- We perform quality checks on our equipment and activities, and we audit these checks when needed.
- We encourage and support our employees to actively participate in improving our processes.

All the necessary information to maintain high-quality standards is documented in Scatec's Operating System. This system, along with this policy, is regularly reviewed and updated to ensure it remains aligned with our strategic direction and goals.

 CEO Terje Pilskog
